# Coming Into Focus: MiTIE Plus LEO MW + StingRay NightCrawlIR Lens

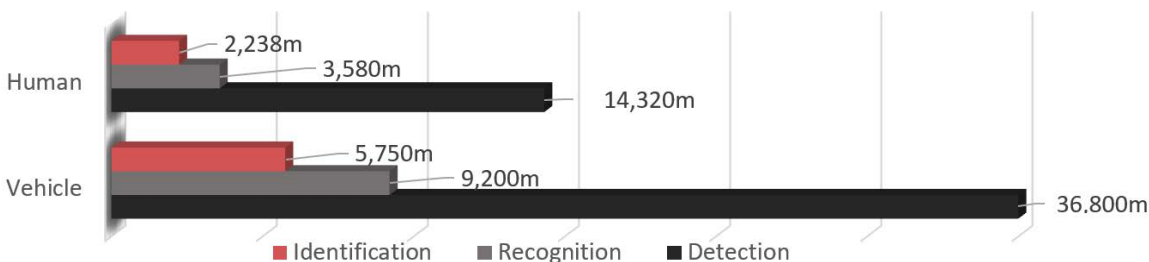

LEO-MW products (640 x 512, 15µm pixel pitch MWIR MCT detectors) are the most reliable choice for commercial and defense surveillance applications.

The StingRay F/5.5 18-430mm MWIR zoom lens is compact as it's built without optical extenders. This approach allows for a shorter overall track length and improved transmission.

- Optimized SWaP (size, weight, and power)
- Enhanced image processing
- Integrated lens control
- Easy operation and integration
